Frost Brown Todd Cincinnati Member Tom Gabelman was a featured speaker at the 2016 P3 Hub Midwest program held in Minneapolis, Minnesota, along with former Vice President Walter Mondale and other P3 experts from around the country. Gabelman introduced a new Public-Private Partnership concept – “the Smart P3” – that combines various applications of the typical P3 projects such as Transportation, Transit, Environmental and Energy, with Social Infrastructure elements such as Education Facilities, Public Buildings/Facilities, Stadia/Arenas, Social Housing, and Healthcare Facilities. Gabelman discussed the \$2.7B Redevelopment of Ohio’s Southern Gateway as a model project for the concept.
