How AI and Big Data are Changing the World

William McKnight, one of the most highly published analysts in information management, offers insights into the future of how big data and artificial intelligence are changing the world. The McKnight Consulting Group is a leading data strategy and implementation firm that helps businesses solve complex problems through the use of growing personal information databases.

Learn from this podcast who is watching us and how our personal data is collected, shared, and used. Discover new analytic uses by enterprises in master data management, how artificial intelligence mines our data to create a burgeoning array of products and services. Hear how AI and other critical technologies will change the world in the next ten years. And consider how this will affect our privacy and what we can do about it.
