Webinar/Video

Authors:

Nilesh (Neal) Patel

Matthew R. Schantz

As AI continues to become more prevalent in everyday business, it's reshaping the landscape for contracting and technology transactions. Best practices in contract provisions, licensing, terms & conditions, warranties, IP protections and data security and privacy are all evolving as new opportunities (and risks) surface from exponential AI uses cases. This presentation covers these, and other topics pertaining to understanding ownership and rights including collaborations, integrated-products, outputs and usage.

This video was created for general informational purposes only as of the time of its creation and does not constitute legal advice, the formation of an attorney client relationship, or a solicitation to provide legal services.

Note: This webinar is the second in a three-part series Frost Brown Todd presented in partnership with Lexology's Masterclass programming.
